

GDML Progress

Adam Patch

January 26, 2011

μ BooNE Geometry

GDML
Progress

Adam Patch

GDML

- This week, adding earth overbearing and ground, pending details from Dixon
- Still having issues adding volumes, working with Brian, Eric and Ben
- GENIE SEGFAULT still present when PMT or any other volumes added to cryostat volume
- New test run moving Test volume between different layers (more on next slides)

μ BooNE Segmentation Fault (running GENIE)

```

μ BooNE Geometry Volume Test

GDML
Progress

Adam Patch

GDML

same errors and segmentation fault

μ BooNE Geometry Volume Test

GDML
Progress

Adam Patch

GDML

no GEVG errors, runs through whole set of events in GENIE
(200)

μ BooNE Geometry Volume Test

GDML
Progress

Adam Patch

GDML

very strange result: has different segmentation fault, not during event production, but when run in gdb, there are no errors...

μ BooNE Geometry Volume Test New Errors

GDML

LBNE Geometry

GDML
Progress

Adam Patch

GDML

- Debugged with Geant4 and GENIE
- Does not work with wiresim and drift electrons (no realistic wire planes yet)
- Simple geometry: 20m rock basin, concrete and steel layers of membrane, and liquid argon

LBNE Geometry

GDML
Progress

Adam Patch

GDML

LAr1 Geometry

GDML
Progress

Adam Patch

GDML

- Now available (very simple)
- Even simpler geometry: steel shell and liquid argon
